INDEX TO VOLUME V.*

A

Academy, National, report for 1897, 395; meeting at Washington, 396.
Actinometers, Electro-chemical, Rigollot, 228.
Agassiz, A., coral reefs of the Fiji group, 113.
Air waves, observation of, Emden, 70.
Alaska, gold fields, 305.
Alternating currents, change into direct, Graetz, 70.
American Microscopical Society, transactions, 321.
Ames, J. S., Manual of Experiments in Physics, 302.
Argentine, Paleozoic faunas, Kayser, 72.
Artesian wells in the Dakotas, Darton, 161.
Association, American, meeting at Boston, 397.
Astronomical Observatory, Harvard, Annual report, 80; Annals, 320.
Atoms in Space, Arrangement of, Van't Hoff, 388.
Auroral period, 27-day, Clayton, 81.
Austin, M., oxidation of manganese, 260; estimation of manganese, 209, 382.

B

Bailey, G. H., Tutorial Chemistry, 390.
Bailey, L. H., Lessons with Plants, 318.
Bain, H. F., limestone at Bethany, Missouri, 433.
Barringer, D. M., Minerals of Commercial Value, 155.
Barus, C., combination tones of siren and organ pipe, 88; electro-magnetic theory of light, 343.
Becker, G. F., Kant as a natural philosopher, 97; auriferous conglomerate of the Transvaal, 193; determination of plagioclase feldspars, 349.
Bigelow, F. H., solar and terrestrial magnetism, 455.
Bliss, W. J. A., Manual of Experiments in Physics, 302.
Bolometer, Langley, 241.
Bonney, T. G., origin of diamonds of South Africa, 76.
Botanical Works—
  Botany, Textbook, Strasburger, Schimper, Noll and Schenck, 471.
  Pflanzenphysiologie, Pfeffer, 317.
  Phytogeography of Nebraska, Pound and Clements, 471.
  Plants, Lessons with, Bailey, 318.
Botany—
  Cell-wall, structure of, Gardiner, 470.
  Cyperaceæ, No. vii, Holm, 47.
  Embryophyta siphonogama, Engler, 156.
  Flora of Franz Joseph Archipelago, Fisher, 236.
  Japanese Characeæ, Allen, 472.
  Permeability of the bark of tree trunks to atmospheric gases, Devaux, 318.
  Transpiration of plants, psychrometer for, Leavitt, 440.
British Museum Catalogues, 75, 319.
Burbank, J. E., X-rays and mineral phosphorescence, 53; phosphorescence by electrification, 55; source of X-rays, 129.

C

Calvin S., geology of Johnson Co., Iowa, 149.
Cathode rays, effect on air, Lenard, 149.
  See also *Röntgen rays* and *X-rays*.
Chalmers, R., pre-glacial decay of rocks in East. Canada, 273.
Chemical Works—
  Chemical Analysis, Manual of, Fleurent, 147.
  Preparations, Inorganic, Thorp, 222.

* This Index contains the general heads, Botany, Chemistry (incl. chem. physics), Geology, Minerals, Obituary, Rocks, and under each the titles of Articles referring thereto are mentioned.

CHEMICAL WORKS—
Chemistry, Analytical, 221; General, Ostwald, 222.
Organic, Noyes, 147.
Physical, Speyers, 390.
Tutorial, Bailey, 390.
CHEMISTRY—
Ammonium cyanide, manufacture of, Lance, 69.
Atmospheric air, influence of the silent discharge on, Shenstone and Evans, 464.
Borides of calcium, barium and strontium, Moissan and Williams, 388.
Carbon, conductivity for heat and electricity, Cellier, 223.
electro-chemical equivalent, Coehn, 218.
varieties of, Moissan, 220.
dioxide, action on soluble borates, Jones, 442.
Chlorine and hydrogen, action of light, Gautier and Hélier, 144.
Chromium tetroxide and perchromates, Wiede, 299.
Copper voltameter, Foerster, 219.
Electro-chemical method for changing currents, Graetz, 218.
Electrolytic decomposition of aqueous solutions, Nernst, 66.
dissociation and osmotic pressure, Traube, 463.
production of iodoform, Foerster and Meves, 466.
Fluorescence and chemical composition, Meyer, 387.
Gases, new methods for measuring, Bleier, 385.
Hydrogen, action on sulphuric acid, 465.
Hydrogen and oxygen, combination, Berthelot, 220; occlusion by palladium, 224.
cyanide, preparation, 465.
Iodine, method of preparing pure, 387.
Iron carbide, direct production, Moissan, 67.
Liquids, solubilities, Aignan and Dugas, 297.
Manganese, estimation of, Gooch and Austin, 209; Austin, 382.
oxidation of, Gooch and Austin, 260.
Osmotic pressure and electrolytic dissociation, Compton, 65.
Oxygen during reduction, evolution of, 298.
sulphur and selenium, series spectra, 145.
CHEMISTRY—
Peroxides, production of, Bach, 68.
Petroleum, formation of natural, Engler, 300.
Potassium percarbonate, Von Hansen, 299.
Refractivities of air, oxygen, etc., Ramsay and Travers, 227.
Rotation angle, new substance for increasing, Walden, 463.
Thermodynamics of the swelling of starch, Rodewald, 297.
Voltaic action, influence of proximity on, Gore, 144.
Chester, A. H., Catalogue of Minerals, 78; krennerite, from Cripple Creek, Colo., 375.
Clayton, H. H., 27-day auroral period and the moon, 81.
Collins, W. D., surface travel on electrolytes, 59.
Comets, orbits of, Stichenroth, 160.
Coral reef, see GEOLOGY.

D

Dana's Textbook of Geology, revised, Rice, 393.
Darton, N. H., geothermal data from artesian wells in the Dakotas, 161.
Dawson, J. W., genus Lepidophloios, 394.
DeLaunay, L., Diamants du Cap, 77.
Derby, O. A., accessory elements of itacolumite, etc., 187.
Diamonds, see MINERALOGY.
Dolbear, A. E., modes of motion, 148.
Durward, A., temperature coefficients of hard steel magnets, 245.

E

Electric arc, acoustic phenomena in, Simon, 302.
between aluminum electrodes, Lang, 149.
discharge in Geissler tubes, theory of stratification, Gill, 399.
in free air, Toepler, 149.
excitation, 302.
resistance standards, 391.
wind, Arrhenius, 148.
Electricity, production by chemical means, Andreas, 146.
Electrolytes, surface travel on, Fiske and Collins, 59.
Electromotive force, J. Trowbridge, 57.

F

Farrington, O. C., datolite from Guanajuato, 285.
Fiji Islands coral reefs, Agassiz, 113.
Fisher, H., flora of Franz Joseph Land, 236.
Fiske, W. E., surface travel on electrolytes, 59.
Fleurent, E., Manual of Chemical Analysis, 147.
Fluids, transparency for long heat ways, Rubens and Aschkinass, 391.
Fluorescence and actinic electricity, Schmidt, 467.
Foote, H. W., clinohedrite from Franklin, N. J., 289.
Franz Joseph Land, geology, 233; flora, Fisher, 236.
Funafuti, coral boring at, 75.

G

Gage, A., physical experiments, 222.
Geological nomenclature, 313.
Geological Reports and Surveys—
  Canada, vol. ix, 1896, 232.
  Georgia, 394.
  India, 394.
  Iowa, vol. vii, 1896, 152.
  New Jersey, 468.
  United States, recent publications, 303, 469.
  Witwatersrand, Southern Transvaal, Hatch, 393.
Geology, Dana's text-book, revised, Rice, 393.
Geology—
  Amphictis, skull of, Riggs, 257.
  Auriferous conglomerate of the Transvaal, Becker, 193.
  Bethany limestone, Missouri, Bain, 433.
  Coral boring at Funafuti, 75.
    reefs of the Fijis, 113.
  Cretaceous of Athabasca river, Tyrrell, 469.
    in Kansas, Gould, 169.
  Earth movement, Van Hise, 230.
  "Florencia formation," Pilsbry, 232.
  Fossil plants, Seward, 472.
  Geology of Franz Joseph Land, 233.
    of Johnson Co., Iowa, Calvin, 149.
  Geothermal data from artesian wells in the Dakotas, Darton, 161.
  Glyphioceras and phylogeny of the Glyphioceratidæ, Smith, 315.
Geology—
  Gold fields of Alaska, 305.
  Jurassic vertebrates from Wyoming, Knight, 186, 378.
  La face de la Terre, Suess, 152.
  Lava flows of the Sierra Nevada, Ransome, 355.
  Lepidophloios, Dawson, 394.
  Madreporarian corals in the British Museum, Bernard, 319.
  Massanutten Mountain, Virginia, geology, Spencer, 231.
  Paleozoic faunas of the Argentine, Kayser, 72.
  Petrography of the Boston Basin, White, 470.
  Pre-glacial decay of rocks in Eastern Canada, Chalmers, 273.
  Protostegan plastron, Wieland, 15.
  See also Rocks.
Georgia geol. survey, 394.
Geyser eruption, conditions affecting, Jaggar, 323.
Gill, H. V., stratification of electric discharge in Geissler tubes, 399.
Goldschmidt, V., Krystallographische Winkeltabellen, 153.
Gooch, F. A., estimation of manganese, 209; oxidation of manganese, 260.
Goode, G. B., History of the Smithsonian Institution, 158.
Gould, C. N., transition beds from the Comanche to the Dakota Cretaceous, 169.
Groth, P., mineralogical tables, 154.
Guthe, K. E., measurement of self-inductance, 141.

H

Harmonic analyzer, new, Michelson and Stratton, 1.
Haswell, W. A., Text-book of Zoology, 319.
Headden, W. P., tin compounds from an old furnace in Cornwall, 93.
Heat conductivity, relative, Voigt, 223.
Hidden, W. E., rhodolite, 294.
Hintze, C., Handbuch der Mineralogie, 316.
Hoffmann, G. C., xenotime in Canada, 235.
Holm, T., studies in the Cyperaceæ, No. vii, 47.
Howe, J. L., Bibliography of Platinum Metals, 322.

I

India geol. survey, 394.
Iowa, Johnson Co., geology, Calvin, 149.

J

Jagger, T. A., Jr., conditions affecting geyser eruption, 323.
Johanniskäfer light, Muruoka, 224.
Jones, L. C., action of carbon dioxide on soluble borates, 442.

K

Kant as a natural philosopher, Becker, 97.
Kayser, E., Paleozoic faunas of the Argentine, 72.
Kleinasiens Naturschätze, Kannenberg, 79.
Knight, W. C., Jurassic vertebrates from Wyoming, 186, 378.
Knipp, C. T., new form of make and break, 283.

L

Lacroix, A., Mineralogy of France, 155.
Langley, S. P., the bolometer, 241.
Leavitt, R. G., psychrometer for study of transpiration, 440.
Light, electro-magnetic theory, Barus, 343.
Visible and Invisible, Thompson, 71.
Lindren, W., orthoclase as gangue mineral, 418.
Lockyer, N., Sun's Place in Nature, 300.

M

Magnetism, determination of, Meyer, 467.
solar and terrestrial, Bigelow, 455.
Magnets, properties of seasoned, Pierce, 334.
temperature coefficients of, Durward, 245.
Make and break, new form, Knipp, 283.
Marsh, O. C., Cuvier prize awarded, 79; collections presented to Yale University, 156.
Mazama, Crater Lake number, 79.
Mechanics, applied, Perry, 80.
Meteoric iron, San Angelo, Texas, Preston, 269.
from Australia, Ward, 135.
structure and origin, Preston, 62.
stone, Jerome, Kansas, Washington, 447.
Mexico, bulletin of geological institute, Aguilera, 152.
Michelson, A. A., new harmonic analyzer, 1; spectroscope without prisms or gratings, 215.
Millikan, R. H., general physics, 389.
Mineral resources of the U. S. for 1896, 469.
Mineralogica, Synopsis, Weisbach, 78.
Mineralogical tables, Groth, 154.
Mineralogie, Handbuch der, Hintze, 316.
Mineralogy of France, Lacroix, 155.
Minerals, catalogue of, Chester, 78; Foote, 155.
of commercial value, Barringer, 155.
MINERALS—
Albite, etching-figures, 182.
Anorthite, No. Carolina, 128.
Anthophyllite, No. Carolina, 429.
Axinite, etching-figures, 180.
Berthierite, Calif., 428.
Beryl, No. Carolina, 432.
Bronzite, Jackson Co., N. C., 431.
Cassiterite, etc., from tin furnace, 93.
Chalcanthite, etching-figures, 182.
Clinohedrite, Franklin, N. J., 289.
Cyanite, No. Carolina, 126; etching-figures, 181.
Datolite, Mexico, 285.
Diamond, artificial production, 469.
Diamonds of South Africa, origin of, Bonney, 76; work on, De Launay, 77; artificial, 469.
Enstatite, No. Carolina, 430.
Feldspars, plagioclase, determination of, 349.
Gersbyite, Sweden, 316.
Gold, crystalline structure of nuggets, 235.
Gold ores containing tellurium, selenium and nickel, 427.
Graphite, graphitite and graphitoid, 146.
Krennerite, Colorado, 375.
Langbeinite, 316.
Leonite, 316.
Molybdenite, Calif., 426.
Orthoclase as gangue mineral, 418.
Raspite, 315.
Rhodolite, 294.
Rhodonite, etching-figures, 182.

MINERALS—
Tourmaline, etching-figures, 178; secondary enlargement, 187.
Tripuhyite, Brazil, 316.
Xenotime, Ontario, 235.
Zircon, No. Carolina, 127; Calif., 426.
Zirkelite, 153.
Mississippi river, floods, 240.
Missouri Botanical Garden, 8th annual report, 78.

N

Nebraska, Phytogeography of, Pound and Clements, 471.
New Jersey, physical geography, Salisbury, 468.
Nipher, F. E., measurement of pressure of wind, 468.
Noyes, W. A., Organic Chemistry, 147.

O

OBITUARY—
Haughton, S., 80.
Marcou, J., 398.
Rogers, W. A., 322.
Schrauf, A., 160.
Winnecke, Prof., 80.
Ostwald, W., Works on Chemistry, 221, 222.
Ostwald's Klassiker der exakten Wissenschaften, 80.

P

Parker, T. J., Text-book of Zoology, 319.
Peirce, B. O., properties of seasoned magnets, 334.
Pendulum, new form, Stevens, 14.
Penfield, S. L., clinohedrite from Franklin, N. J., 289.
Pennsylvania, Brownstones of, Hopkins, 78.
Perry, J., Applied Mechanics, 80.
Petrology for students, Harker, 317.
Pfeffer, W., Pflanzenphysiologie, 317.
Phosphorescence produced by X-rays, Burbank, 54; by electrification, Trowbridge and Burbank, 55.
Physical Experiments, Gage, 222.
Physics, Deductive, Rogers, 148.
Experiments in General, Stratton and Millikan, 389.
Manual of Experiments in, Ames and Bliss, 302.
Stone, 222.
Physikalisch-chemische Propädeutik, Griesbach, 321.
Pilsbry, H. A., "Florencia formation," 232.
Pratt, J. H., mineralogical notes from North Carolina, 126, 429; rhodolite, 294.
Preston, H. L., San Angelo meteorite, 269; iron meteorites, structure and origin, 62.
Prinz, geological experiments, 392.
Psychrometer, Leavitt, 440.

R

Radiant heat, transmission by gases, Brush, 222.
Ransome, F. L., lava flows of the Sierra Nevada, 355.
Rayleigh, nature of the X-rays, 467.
Rice, W. N., Dana's Textbook of Geology, revised, 393.
Riggs, E. S., skull of Amphictis, 257.
ROCKS—
Amphibole-pyroxene rock, Calif., 423.
Diorite, Calif., 422.
Granitic breccias of the Cripple Creek region, Stone, 21.
Itacolumite, accessory elements of, Derby, 187.
Latite, Sierra Nevada, Ransome, 355.
Quartz-alunite rock, Calif., 424.
Quartz-amphibole-diorite, Calif., 421.
Rogers, F. J., Deductive Physics, 148.
Röntgen radiation, influence on combination of ions, Rutherford, 386.
Röntgen rays, heat produced by, Dorn, 148.
nature of, Stokes, 301.
original papers on, Röntgen, 223.
and ordinary light, Rayleigh, 467.
see also *X-rays*.
